PROFESSIONAL SUMMARY

Software Testing professional with practical exposure to manual testing, Selenium WebDriver automation using Python, SQL database validation, and API testing using Postman. Familiar with test case design, test execution, defect reporting, SDLC, STLC, and Agile methodologies. Strong programming foundation in Python and Java, with an interest in developing reliable and maintainable automation testing solutions.

TECHNICAL SKILLS

Automation Testing: Selenium WebDriver, Python Automation, XPath, Locators, Waits, Test Case Execution
Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Defect Reporting, SDLC, STLC
API Testing: Postman, REST API Basics, JSON Validation
Programming: Python, Java, SQL
Database: Oracle SQL, MySQL, Joins, Subqueries, Data Validation
Tools: Git, GitHub, VS Code, Jupyter Notebook

EXPERIENCE

HARMAN *July 2026 - Present*
L1 Tester Intern – Toyota DCM24 TCU

- Worked on the Toyota DCM24 Telematics Control Unit (TCU) project, supporting software testing and system validation activities.
- Utilized Linux-based environments for test execution, system monitoring, data collection, and troubleshooting.
- Analysed test results, validated system behaviour, and identified unexpected outputs and potential software defects.
- Collaborated with cross-functional teams to report technical issues, investigate defects, and support effective testing activities.

QSpiders, Bangalore *Dec 2025 – June 2026*
Software Testing Trainee

- Practicing software testing concepts, test case preparation, and test execution.
- Performing SQL-based backend validation and preparing test data for testing scenarios.

RELEVANT PROJECTS

UML2TEST AI – AI-Based Test Case Generation

- Developed a system to process PlantUML use-case diagrams and represent software components as unified graphs.
- Explored Graph Neural Networks and LLM-based approaches for automated test case generation.
- Technologies: Python, PyTorch, GNN, Llama 3, Hugging Face.

Football Analytics Hub

- Developed a Python-based application integrating machine learning and computer vision for football analytics.
- Implemented player detection and tracking using YOLOv8 and OpenCV.
- Technologies: Python, Streamlit, YOLOv8, OpenCV, Scikit-learn.
